

Name: _____

Syllables

VCE words are words with this pattern:
vowel - consonant - silent e

The silent e is sometimes called the “magic e.” The “magic e,” it makes the vowel before it long.

example: trombone

The “magic e” at the end makes the o a long vowel.

When you divide trombone into syllables, you split the word between the consonants m and b. trom/bone

Directions: Separate these "magic e" words into syllables.

- | | | |
|-----|---------|-------|
