

Collins Primary Maths is specifically written to The Framework for Teaching Mathematics. The course provides daily maths lessons for each school year running from Reception/Foundation Stage to Year 6, and is matched to the relevant Scottish 5-14 Guidelines for P1 to P7. Through its comprehensive teacher and pupil material, Collins Primary Maths supports teachers in achieving high levels of numeracy with their whole class.

Teacher's Guide  covers each of the Framework objectives for Year 4 and comprises the following elements:

- An **Introduction** to the course, its coverage of the Framework and how it supports the aims of the National Numeracy Strategy.
- A bank of **Oral Work and Mental Calculation** activities for the first 'warm up' stage of every lesson.
- **Lesson Plans** for every day of the school year which follow the three-stage structure recommended in the Framework.
- **Resource Copymasters** for use with particular lessons.
- **Assessment materials** to help teachers chart their coverage of objectives and review pupil progress in the short, medium and long term.

Teacher's Guide

Teacher's Guide

Peter Clarke
Series Editor

"We chose CPM because of the clarity, ease of use, time-saving approach and IT"

Mrs Gatenby of Salterebble, Calderdale

"The best resource I have ever seen in 31 years of teaching"

Mrs Gaunt, St Joseph's Primary School, Leeds
